Suction Effective Mandibular Complete Denture Master Class

Speakers: Dr Jiro Abe, Mr Arnie Jabour
Assistant Clinical Instructors
- Dr Kelvin Khng, Dr Zhao Long

Date: 30 April to 2 May 2018

Venue: T32 Dental Centre,
One Orchard Boulevard,
17th Floor Camden Medical Centre,
Singapore 248649

Mandibular suction dentures are not something impossible. In 1987, Dr. Abe started researching the suction mechanism of the mandible. Following his research, he established a successful method to fabricate a Suction Effective Mandibular Complete Denture (SEMCD) in 1999. Dr Abe identified a most effective way to reproduce this suction and developed a reliable system that could produce predictable results.

Learning the suction denture technology that Dr Abe has created is highly recommended for all general practitioners who want to constantly achieve mandibular denture suction and help their patients. Dr. Abe chose the BPS System by Ivoclar Vivadent as it has the best mechanism to ensure the successful delivery of his techniques. The BPS concept is a proven system that you can learn to achieve high quality precision dentures. The systematic approach helps the clinician and technician to be in harmony and repeatedly deliver good suction dentures in just 4 appointments.

Objectives

This workshop will concentrate on both of clinical and technical performance with live patients. Through this workshop, participants will learn about:

- *Treatment plans derived from data collected during intra-oral examination*
- *Tray design for mandibular suction effectiveness*
- *Fabrication of suction-effective custom trays*
- *Suction-effective preliminary using a frame cut back tray*
- *Determining the vertical and horizontal position with the Gnathometer M or wax rims*
- *Final functional SEMCD impressions using the closed mouth impression technique*
- *Tooth set-up with the model analysis*

REGISTRATION

YES! Send me a form via email to sign up as member or sign up at www.cgdp.org.sg

Name _____ DCR No. _____
